

BHAVESH KANOJE

AI & Machine Learning Engineer

Raipur, Chhattisgarh • [✉ bhavesh23official@gmail.com](mailto:bhavesh23official@gmail.com) • [📞 +91 7987278313](tel:+917987278313)
[🌐 LinkedIn](#) • [🐙 GitHub](#)

PROFESSIONAL SUMMARY

B.Tech graduate in Artificial Intelligence with expertise in deep learning, generative AI, and computer vision. Proven experience through internships at IIST and Reality AI. Skilled in Python, TensorFlow, PyTorch, and cloud deployment. Seeking entry-level AI/ML engineering role to drive innovation in real-world applications.

EDUCATION

B.Tech (Hons) in Artificial Intelligence <i>Chhattisgarh Swami Vivekanand Technical University</i>	2021 – 2025 Bhilai, India
CBSE (Class XII – PCM) <i>Kendriya Vidyalaya No.2</i>	2020 – 2021 Raipur, India

EXPERIENCE

Generative AI Intern <i>Reality AI</i>	May 2025 – Sept 2025 Remote (Gurugram, India)
- Developing Voice AI and Agentic AI solutions using cutting-edge generative models - Working on multimodal media processing and real-time AI applications	
Research Intern <i>Indian Institute of Space Science and Technology (IIST)</i>	Feb 2024 – Jul 2024 Thiruvananthapuram, India
- Engineered neural network models for security applications achieving 95% accuracy using Python and TensorFlow - Conducted satellite imagery analysis research for space science applications	

TECHNICAL SKILLS

Programming: Python, C++, SQL, HTML, CSS, JavaScript, R-Language, Flutter& Dart
AI/ML Frameworks: TensorFlow, PyTorch, Keras, Transformers, OpenCV, Scikit-learn
Specializations: Deep Learning, Computer Vision, NLP, GANs, LLMs, MLOps
Tools & Platforms: AWS, Git/GitHub, Streamlit, Unity, Blender, Docker, AndriodStudio

KEY PROJECTS

- Bhavesh AI Voice Cloner | *Python, Streamlit, Transformers, LLMs***
- Built zero-shot TTS system with 0.5B Llama backbone for real-time voice cloning from seconds of audio
- Smart Parking & Surveillance System | *Python, YOLO, Computer Vision***
- Achieved 97.47% accuracy in real-time parking detection, exceeding 90% industry benchmark
- Anomaly Detection in Surveillance | *Python, GANs, Machine Learning***
- Implemented GAN-based AI model for detecting suspicious activities in CCTV feeds with 92% accuracy
- Disaster Impact Analyzer | *TensorFlow, Keras, Streamlit, OpenCV***
- Developed multi-modal AI system for disaster prediction with 3-hour predictive window

ACHIEVEMENTS & LEADERSHIP

- Lead Project Coordinator:** Programmer's Paradise Coding Club. | **Student Member:** IEEE
- Hackathon Winner:** Hacksprint (OP Jindal University) | **Semifinalist:** I.Mobilothon 4.0 (Volkswagen)
- Certifications:** Flutter & Dart (Udemy), AWS Data Analytics (Coursera), AI for Investments (NPTEL), High Performance Scientific Computing (NPTEL)
